

FOR IMMEDIATE RELEASE

Plustek Unveils AI OCR for Enterprise Document Workflows at COMPUTEX 2026

Unlocking Human-Like Document Understanding to Accelerate Enterprise Automation

TAIPEI, Taiwan, May 4, 2026 – Plustek Inc., a leading provider of professional scanning and intelligent document solutions, will debut its next-generation AI OCR at COMPUTEX 2026, taking place June 2–5 at the Taipei Nangang Exhibition Center, Hall 2, Booth #Q0116. Moving beyond conventional OCR, the new technology transcends the limitations of extracting everyday documents, whether printed or handwritten, into machine understandable context to drive greater automation, higher accuracy, and productivity.

The evolution of document technology has reached a critical turning point. While traditional OCR acted only as "eyes" that could see text without understanding it, and rule-based systems added basic logic, Plustek's AI OCR introduces a cognitive layer, that functions as an experienced professional recognizing, interpreting, and extracting key information from ID cards, invoices, and complex forms automatically.

Most enterprises remain tethered to manual review because their systems lack the "professional intuition" to handle layout variations. By integrating a Plustek AI OCR directly into the capture stage, allows organizations high-velocity data integration, turning physical documents into structured digital assets with minimal human oversight.

"We are evolving document technology from simple sight to true understanding," said Karen Ku, Vice President of Sales at Plustek. "Traditional systems were limited by rigid rules, but our AI OCR understands the mission. It doesn't just see an ID card or an invoice; it knows exactly which data points are critical for your business and extracts them with human-like precision. The result is faster operations, stronger compliance, and lower administrative burden to finally automate organizations' most complex paper-based workflows."

Visitors to the Plustek booth will experience live demonstrations across real-world business scenarios using Plustek's latest scanner lineup. Daily presentations at 11:00 and 15:00 will offer interactive introductions to the technology, while one-on-one consultations will be available throughout the show to explore tailored solutions. Join Plustek at COMPUTEX 2026 to discover how context-aware document processing is transforming information handling, turning data into intelligent action that drives real business impact.

ABOUT PLUSTEK

Founded in 1986, Plustek Inc. is a global leader in imaging and document automation. By bridging the gap between hardware and intelligence, Plustek integrates AI Scan technology with sophisticated AI OCR to transform physical documents into structured, actionable digital assets. Our intelligent process automation technologies innovations help shape organizations to grow their businesses across hospitality, government, logistics, healthcare, and financial sectors. With a tight-knit global network and nearly four decades of manufacturing excellence, Plustek delivers the reliable, high-performance intelligence required for modern digital transformation.
