

## Press Release

# Plustek Highlights Intelligent Document Automation at CES 2026

*Connected, Automated Scanning Solutions Transforming Modern Workplaces*

**Santa Fe Springs, Calif., November 12, 2025 [CES Booth #9517, LVCC, North Hall]** – Plustek Inc., a global leader in imaging and document processing technology, will spotlight its next-generation intelligent document automation at CES 2026 in Las Vegas, NV, January 6–9. As CES highlights innovations shaping the workplace of tomorrow, Plustek introduces connected, automated scanning solutions that bridge physical and digital workflows. From real-time data capture to smart automation and cloud collaboration, the 2026 lineup empowers organizations to redefine productivity and accelerate digital transformation.

Plustek will bring innovation to life across three key solution areas, empowering smarter workflows:

- **ID Solutions** revolutionize guest check-in automation with MobileOffice front-desk scanners and SecureScan kiosk-ready devices, both powered by AutoFill ID Wizard. By instantly extracting and populating ID data into web forms and desktop applications, they eliminate manual entry, boost accuracy, and remove integration hurdles—delivering frictionless guest experiences at reception.
- **Network Solutions** enable PC-free, connected scanning through Wi-Fi and Ethernet, sending documents securely to cloud services, SharePoint, FTP, or SMB. From the high-speed, advanced eScan A450 Pro to the compact, affordable Qscan 30, teams unlock streamlined, optimized workflows, enabling globally distributed workforces to collaborate smarter and simplify IT setup.
- **Document Solutions** feature SmartOffice high-speed scanners with versatile ADF and large-format document handling for departmental or enterprise use. Integrated with FileDistributor II and AI-powered data recognition, scanned files are intelligently named, categorized, and archived in batches—accelerating productivity while ensuring consistency and compliance.

“These solution areas embody Plustek’s vision for connected, adaptive, and intelligent document automation,” said Karen Ku, Plustek’s VP of Sales. “From guest-facing check-in to enterprise-scale digital workflows, we’re bridging hardware capabilities with software automation to help organizations work faster, collaborate seamlessly, and drive lasting digital transformation.”

Attendees can experience Plustek’s intelligent document automation firsthand at Booth #9517, where interactive demos will showcase the future of integrated scanning. Join Plustek at CES 2026 to engage with experts and explore personalized automation strategies. Discover how the latest document processing breakthroughs can transform workflows, tackle critical challenges, and shape a truly digital-first workplace.

## **ABOUT PLUSTEK**

Plustek, founded in 1986, has become the global imaging solution provider that designs, manufactures, and markets a comprehensive range of imaging scanners for consumers and prosumers. Our intelligent process automation technologies innovations help shape organizations to grow their businesses. We make sure we stay ahead and continue to innovate and deliver technologies that are both reliable and powerful to meet our customers' needs and expectations. By redefining user experience with data extraction technologies allowing us maximized businesses' performance to fuel digital transformation, unleashing the data insights for people wherever they might be, established dedicated points of contact and tight-knit global sales, marketing, support teams for our intermediary and end clients to furnish the most efficient services around the world in global scope yet with a local touch.
